

Purpose and Outcomes of the Workshop

- Input for the FRIB Conceptual Design Report (CDR should be complete by early summer).
 - Collection of equipment concepts
 - User input on required facility space and infrastructure
 - Help make the case that the planned facility and equipment is a match to the scientific goals
- Feedback from the FRIB Science Advisory Committee
 - Will help collaborations strengthen future proposals for funding
 - Will confirm that the equipment planning is a match to the scientific goals of FRIB as outlined in the 2007 NSAC LRP and the 2007 NSAC RIB Task Force
- The FRIBUO is organizing the writing of the scientific part of the CDR. This document is not a direct outcome of this workshop, but will be influenced by the equipment and scientific discussions
- Further development of collaborations and equipment ideas
- Identification of significant R&D issues that should be addressed
